

– FOR IMMEDIATE RELEASE –

MobiQuest releases new version of MobiQuest's Mobile Instant Messaging (MQIM) with **innovative conference chat**.

Singapore – Dec 19, 2008 – MobiQuest, provider of innovative mobile applications, announced today that it has released next generation version of MQIM.

The newly added conference chat feature allows user to conference with users from any of the public IM. The innovative feature would enable users to maintain their existing accounts and still be able to talk to users of any other public IM. **The conference chat can have users of MSN, Yahoo, Gtalk or AOL into the same conference. This is the first such Cross IM Conference chat available.**

MQIM enables users with AOL, Google Talk, MSN, and Yahoo Messenger accounts to chat in one interface on Mobile Phone without having to download or install any application on their mobile.

According to research firm, The Radicati Group, the number of public IM accounts worldwide is 993 million and the market will reach an estimated 1.5 billion accounts by 2011. Furthermore, research analysts at Informa estimate the global market for mobile instant messaging will become an \$11 billion (€7.4bn) industry by 2011.
