

# Mobile Unified IM

## Major Instant Messaging Networks on a Single Screen

MQ unified instant messaging (IM) is an application for mobile devices. MQIM allows the consumer to enjoy the advantages of instantaneous messaging application with none of the limitations normally associated with a mobile IM solution. MQIM is available for even the simplest of mobile devices on today's market, as well as the more traditional high end phones.

### Supported IM Services

MQIM will create an experience on the mobile device that is similar to the best possible desktop experience, whereby all of the major IM networks such as AOL, Google, Jabber, ICQ, Microsoft and Yahoo! can be easily accessed by the mobile user.

### Features :

- Mobile Client is supported on MIDP2.0 and CLDC1.1 devices (including Windows Mobile and Blackberry devices)
- Easy to use interface
